Gymnasium

Concordia Lutheran Jr. & Sr. High School

Challenge

- The gym lacked user-friendly controls for different activities (athletics, fine arts events, graduation, etc.)
- On average, the lights were on for 16 hours a day, so energy costs were high

Solution

- Specify a wall-mounted and app-based control solution with pre-programmed scenes
- Redesign the lighting layout to reduce the number of fixtures and associated energy costs

Improvements/Benefits

- Fixture count reduced by almost 30%, and energy usage reduced by 45%
- Customizable scenes allow for different areas of the gym to be lit up or dimmed down for various events.

"This was a total solutions opportunity for Concordia as opposed to just hiring an electrician. Beginning with an energy audit and concluding with an installation and product training, Voss was focused on our needs as the customer and end user. They improved the quality, control, and efficiency of the lighting, and the project will quickly pay for itself in savings."

- Rob Cooksey, Head of School

Bringing a better light to our world, since 1939.
