

Case Study

Slumberland Showroom Floor Lighting

Challenge

- Ongoing maintenance issues due to frequent lamp replacements and associated costs.
- High energy expenses stemming from a large volume of lamps.

Solution

- Replaced the existing gimbal and lamp setup with a new LED integrated track head, doubling the lifespan of the lighting source.
- Achieved substantial energy savings through reduced power consumption.

Improvements/Benefits

- Lowered total cost of ownership by reducing product and replacement costs by 50%.
- Provided a 20% reduction in energy costs for the store with the new efficient lighting system.
- Enhanced showroom aesthetics and vignette lighting with a sleek, professional fixture.
